

Welcome to SemiProbe

What makes
SemiProbe
different from
other vendors?

- ◆ Complete line with accessories
- ◆ Modular product design
- ◆ Field upgradeable
- ◆ Custom application capabilities
- ◆ Quality reliable products
- ◆ Low cost of ownership
- ◆ SemiProbe customer advantage
- ◆ Full warranty

Complete Line with Accessories

Manual, Semi &
Fully Automatic
Probing Systems

LA-150 DC & LA-150 HF

Cost effective entry
level probing
systems with
impressive
features at
unbeatable prices!

Probe System For Life™

Like the Erector Set you had as a child, PS4L allows you to “build” your wafer probing system with the features and capabilities you want and at a cost that meets your budget!

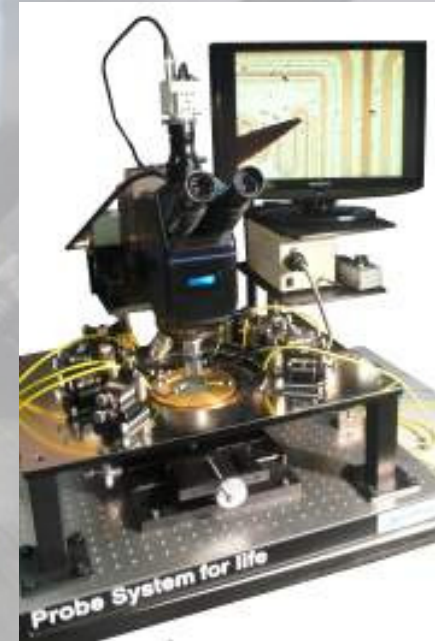

The best part of the system is that as your needs change and your budget grows you can add to your system each year!

Modular Product Design

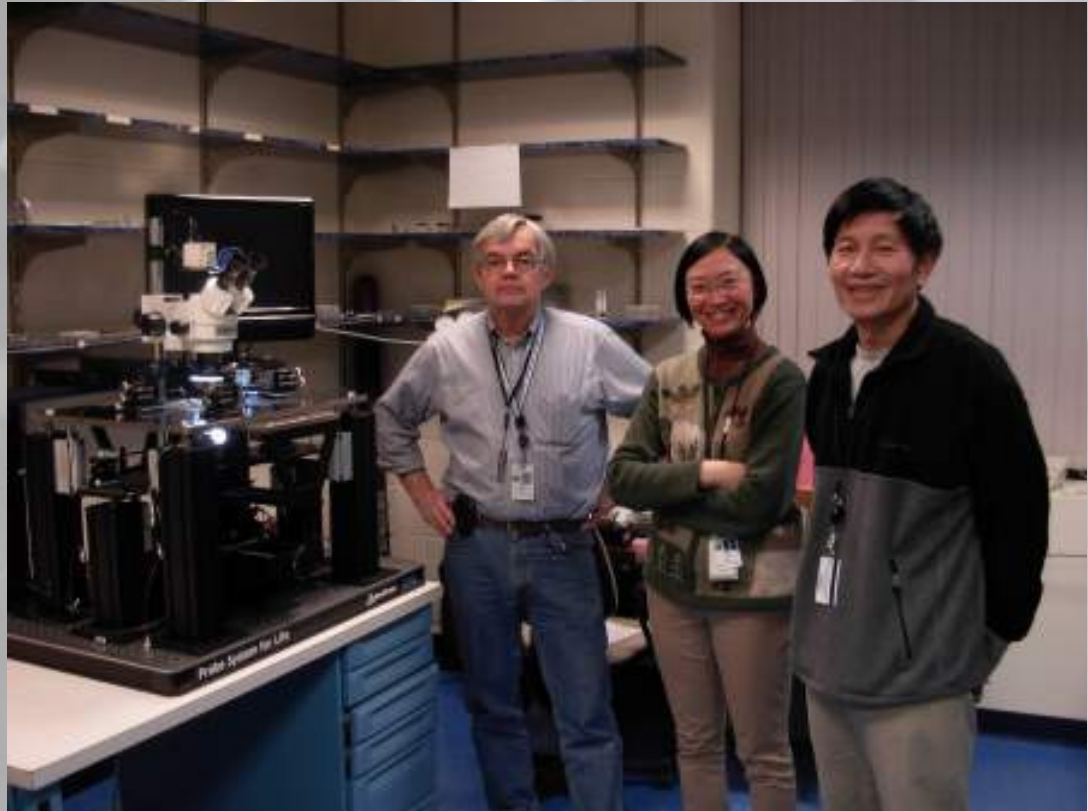

From this to
this...It's the
same
station!

Field Upgradeable

Your system can
be upgraded at
your facility to
provide new
capabilities!

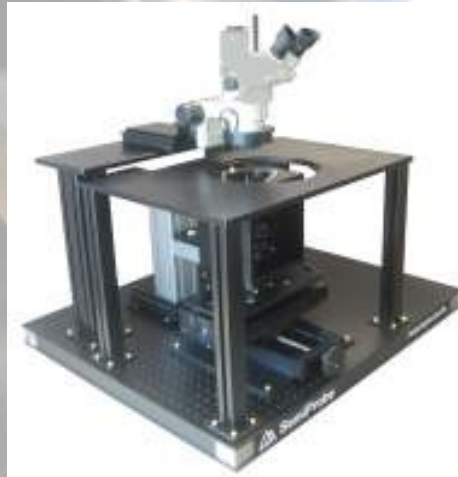

PS4L Upgraded to Simultaneous Double Sided
Probing Application

Custom Application Capabilities

Our modular approach allows for fast modifications to meet your most advanced products needs today and tomorrow!

MRAM Research

HF / Microwave

Solar Cell Test

Optoelectronics

Quality Reliable Products

SemiProbe systems have a track record of high online service, low maintenance and when repairs are needed our modular design allows for fast return to service!

From Lab to Fab!

Low Cost of Ownership

Cost of ownership goes beyond the basic purchase price. It includes the cost of lab space, maintenance & repairs, downtime, and the life span of the system. Because the Probe System for Life can be upgraded to meet your future needs be it automation, larger wafer size, different substrate, temperature, pressure, environmental control, etc. You can save approximately 70% over having to go and buy a new system for the changed application! SemiProbe's modular flexibility allow you to minimize the size of your station to reduce overhead cost.

SemiProbe Customer Advantage

What is Semiprobe Customer Advantage?

Simply stated it is the ability of the customer to buy exactly what he or she needs and can budget and not a machine configuration some equipment company has put together to offer everyone. It means that you can spend your budget dollars buying only the features you really need or that will help you do your job easier and better. And when you need more capabilities at a later date, our system allows you to upgrade it to meet those needs!

Full Warranty

All SemiProbe products are covered by a full 1 year warranty. This warranty includes all parts, labor and travel. Beyond the warranty it is the owners and their reputations who stand behind your new system. With over 60 years of combined service to the Semiconductor Equipment market, we have prospered in this market because of this reputation!

I wanted to go on record to thank you and the team for supporting Discera's needs, while concomitantly assuring that the schedule is made. Your support has been outstanding, and we appreciate it.
